¹including 20 mm pull-out [tol. -5; +30 mm]

²cylinder is delivered including oil inlet swivel adapter and cup

specifications

total stroke ¹	1540 mm
dry weight cylinder only	36 kg
total volume	8.8 L
working volume	7.8 L
maximum pressure	190 bar
maximum pump flow	24 l/min
maximum allowable thrust first stage ³	8.0 ton
oil inlet	1/2" BSP

technical notes

This cylinder is a lifting device only and may not be used as a structural member or be subjected to side load. Side load and/or poor alignment might result in cylinder leakage. Hyva therefore strongly recommends the use of a cradle, even in instances where the cylinder only tips to the rear or to the side.

The cylinder is painted black RAL9005. For suitable hydraulic oils, please refer to data sheet OIL-0011. For details of available brackets and cradles, please refer to data sheet 015BRA07.

Detailed calculations can be made using the HYVA Tipper Program, freely available from tipper.hyva.com.

³The cylinder thrust on the first stage (from the HYVA Tipper Program) must not exceed the maximum allowable (see specifications above).
